(54) Title: PCKA MODIFICATIONS AND ENHANCED PROTEIN EXPRESSION IN BACILLUS

(57) Abstract: The present invention provides cells that have been genetically manipulated to have an altered capacity to produce expressed proteins, wherein the pckA gene has been modified or deleted. In particular, the present invention relates to Gram-positive microorganisms, such as Bacillus species having enhanced expression of a protein of interest, wherein one or more chromosomal genes have been modified and/or inactivated (e.g., pckA), and preferably wherein one or more chromosomal genes (e.g., pckA) have been modified and/or deleted from the Bacillus chromosome. In some further embodiments, one or more indigenous chromosomal regions have been modified and/or deleted from a corresponding wild-type Bacillus host chromosome.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER

INV. C07K14/32 C12N15/63 C12N9/88
ADD. C12R1/125

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
C07K C12R C12N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ, MEDLINE, Sequence Search, BIOSIS

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	WO 03/083125 A (GENENCOR INTERNATIONAL, INC; FERRARI, EUGENIO; HARBISON, CAROLE; RASHI) 9 October 2003 (2003-10-09) the whole document, in particular p. 86, 1.1-15 and claims	1-27, 38-44, 55-64

☒ Further documents are listed in the continuation of Box C.

☒ See patent family annex.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- *G* document member of the same patent family

INTERNATIONAL SEARCH REPORT

International application No.
PCT/US2005/011821

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
1-27, 38-44, 55-64

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

Invention1: Claims: 1-27,38-44,55-64

Microorganisms (in particular Bacillus) comprising a modified pckA gene, methods for enhancing production of a protein by inactivating the pckA gene and methods for obtaining Bacillus subtilis strains having enhanced protease production wherein pckA is deleted in the chromosome of said strains.

Inventions 2-28: claims: 28-37 (all partially)

Isolated nucleic acids (SEQ ID NOs:1,3,5,7,9,11,13,15,39,40,42,44,46,48,50,37,25,21,50,23,27,19,31,48,46,35,33, corresponding sequences of encoded polypeptides SEQ ID NOs:2,4,6,etc.) and host cells transformed with said nucleic acids.

Invention 29: Claims 45-54

Methods for obtaining an altered Bacillus strain expressing a protein of interest, wherein said Bacillus host cell comprises the pckA gene and has furthermore one or more chromosomal genes inactivated.

Invention 30: Claims: 65-74

Methods for enhancing the expression of a protein of interest in Bacillus, wherein said Bacillus host strain comprises a deletion of an indigenous chromosomal region.

Invention 31: Claims 75-81

Methods of enhancing the expression of a protein of interest in Bacillus wherein the nucleic acid for the protein of interest is obtained by transcriptome DNA array analysis.

Invention 32: Claims 82-85

Methods for enhancing the expression of a protein of interest in Bacillus wherein an altered Bacillus strain is used which comprises a modified gene selected from the group consisting of prpC, sigD and tdh/kbl.
